Is property located within a historic district? ☒ no ☐ yes Name of district N/A

Is district listed? N/A no ☐ yes

Documentation on the property/district is presented in: Project Review and Compliance files

Description of Property and Eligibility Determination

This structure is a standard concrete slab, with two spans (one 8'2", the other 7'4"), which has been lengthened and widened. This structure was originally constructed as a one span concrete slab but the south abutment of the original structure was modified and is now the pier of the two span structure. We have determined that this structure lacks the requisite integrity to be considered eligible for inclusion in the National Register as a type of concrete slab small structure. To be considered for listing, according to the Small Structures on Maryland's Roads, Historic Context Report (p. 4-10) concrete slab small structures should retain parapets, abutments and wingwalls as primary character defining elements of the substructure. Although this structure retains some of the original elements, some have been added during a major reconstruction. These changes have compromised the integrity of the structure.
